SUMMARY

I am a developer with knowledge in frontend, backend, SEO and experienced in remote work collaboration.

I have coding abilities in React, Next.js, JavaScript, Node.js, and API integration with a track record of enhancing web performance.

Furthermore, I bring over two years of dedicated experience to contribute to your mission.

EXPERIENCE

React Developer

2021 - Present

Freelance

Remote

Web App Development for USA Business.

- **Designed and developed component-based**, responsive web applications using React with TSX, ensuring type-safe coding practices.
- **Utilized Next.js** for server-side rendering, enabling optimized performance and improved SEO for business web apps.
- **Integrated Tailwind CSS** for streamlined and efficient UI development, delivering visually appealing and user-centric designs.

WordPress + JavaScript Developer

06/2022 - 07/2023

Command Center

Chicago, IL

WordPress Web Business Management Consultancy

- **Optimized website architecture** to ensure search engine crawlers index content, resulting in a 20% boost in organic traffic.
- **Collaborated with a cross-functional team** to align visual elements with branding and design.
- **Created and managed** email marketing campaigns.
- **Debugged**, tested, and maintained existing codebase.

STRENGTHS

Clean, Simplified & Organized Code

Highly organized with an attention to detail, my ability to spot even the smallest inconsistencies helps ensure the quality of the final product.

Teamwork & Communication

Adept at working in Agile teams and utilizing Scrum to achieve project goals. Proficient in Jira for project management, along with communication channels such as Slack, Zoom, and email.

Time Management

Capacity to prioritize tasks, meet deadlines, manage workloads. Timely completion of development projects while delivering high-quality results.
